## OTHER RELEVANT INFORMATION AND SUGGESTIONS

- **Winter high season:** We recommend making hotel and restaurant reservations in advance.
- **Raffles and surprises** throughout the event.
- It is recommended to bring spare materials and indoor footwear suitable for gymnasts and technical equipment.
- We recommend that clubs take out specific insurance for travel abroad if they do not already have it, as the federations are not responsible for certain costs as they are outside the EU area.
- In Andorra, there is often no mobile data coverage because the country is not part of the European Union in terms of telephone roaming, and it depends on the operator in your country. This means that phones do not always connect to the Internet without prior configuration. There are telephone services that offer virtual SIM cards at reduced costs to be able to have data during your stay in the country: Citysherpa, Grandvalira,...

### Recommendations if you come to Andorra:

- **Activate international roaming before you travel**
  - Check with your operator if your plan includes data in Andorra.
  - Special rates may apply.
- **Buy a local SIM card in Andorra**
  - Operators such as **Andorra Telecom** offer prepaid cards with data and calls either by city sherpa (app) or grandvalira.
  - Very useful if you need constant internet during the weekend.
- **Use public or hotel Wi-Fi**
  - Most hotels, restaurants, and some public spaces offer free Wi-Fi.
  - It may be enough if you only need a one-off connection.
  - Public Wi-Fi is NOT available in the competition and training halls.
- **Offline applications**
  - Offline maps (Google Maps offline or Maps.me) to orient yourself without data.
  - Translation and tourist guides that work offline.

## LEGAL INFORMATION AND PRIVACY

- By registering, participants authorize the publication of visual materials (photos and videos) used by the organization. If anyone objects, they must inform the organization in writing before the start of the event.
- Only accredited journalists and photographers may use professional equipment; Mobile devices are unrestricted.
